Adam and David,

Good luck meeting with the county. The call with HQ will be interesting, informative.

[REDACTED] David Albright will be out of the office tomorrow, but would like to be a part of the conversation, as would George Robin -- will you be available on Monday for a call? Would 11 am (2 pm east coast) work for you? David and I are scheduled to meet with Shell and Solano County in person on Tuesday, so I believe a call with you in advance of that meeting would be especially helpful. Thank you.

Thanks Dave!

I am WAH this morning, planning to apply this afternoon to Sick Lv. unless I get pulled into business, no problem - [REDACTED]

[REDACTED]

thanks,
George

Subject: CCS Risk Assessments?

Team--

I just got a call from Nedzlene Ferrario at Solano County. They are likely going to be requiring Shell to conduct a quantitative risk assessment for their proposed CCS operations. She asked if our office has had any experience conducting risk assessments or knew of any guidances that we knew about that could help them craft their own assessment. I gave her Bruce Kobelski's contact information, as he seems to be one of the national authorities on CCS risk analysis. If anyone knows of any further documents or contacts that would help Solano County out, please let me know. Thanks.

-Adam

I should also note that the city planner at Solano County who was previously our contact for the Shell project, Michael Profant, was recently laid off. Nedzlene's general tone about it was, "who knows if any of us will be around soon?"
